

# Utility Case Overview

## Client Specifications:

- Small municipality was unable to track all water usage
- Multiple electronic release systems  
Several individual meters

## Resolution:

- Installation of collector (CEP™) to collect data from all disparate sources
- Provided ethosAnalytics (eA) for easy to read dashboards and reports
- Geo Mapping correlation connected to individual meters, release switch and billing address

## Effects:

- Increased Efficiency
- 10,000+ Gallons were not being billed by address
- Improved customer reporting
- Decreased expenditures by 3% of annual budget
